

```
/*  
program Name: avg of my inter marks  
*/  
#include<stdio.h>  
intmain()  
{  
int san1,san2,eng1,eng2,math1A,math1B,math2A,math2B,phy1,phy2,chem1,chem2;  
float t,a;  
  
printf("Enter the value of san1");  
scanf("%d",&san1);  
printf("Enter the value of san2");  
scanf("%d",&san2);  
printf("Enter the value of eng1");  
scanf("%d",&eng1);  
printf("Enter the value of eng2");  
scanf("%d",&eng2);
```

```

printf("Enter the value of math1A");
scanf("%d",&math1A);
printf("Enter the value of math1B ");
scanf("%d",&math1B);
printf("Enter the value of math2A");
scanf("%d",&math2A);
printf("Enter the value of math2B");
scanf("%d",&math2B);
printf("Enter the value of phy1");
scanf("%d",&phy1);
printf("Enter the value of phy2");
scanf("%d",&phy2);
intf("Enter the value of chem1");
scanf("%d",&chem1);
intf("Enter the value of chem2");
scanf("%d",&chem2);
t=san1+san2+eng1+eng2+math1A+math1B+math2A+math2B+phy1+phy2+chem1+chem2;
a=t/12;
printf("Total is %Of",t);
printf("\nAverage is:%%f",a);

}

```

**Output:**

```
Enter the value of san1 90
Enter the value of san2 95
Enter the value of eng1 86
Enter the value of eng2 91
Enter the value of math1A 71
Enter the value of math1B 71
Enter the value of math2A 72
Enter the value of math2B 73
Enter the value of phy1 56
Enter the value of phy2 50
Enter the value of chem1 56
Enter the value of chem2 54
Total is Of
Average is:%72.083336
