```c
#include <stdio.h>
int main()
 {
float iPhonePrice, coverPrice, total;
printf("Enter the price of iPhone: ");
scanf("%f", &iPhonePrice);
printf("Enter the price of Cover Case: ");
scanf("%f", &coverPrice);
total = iPhonePrice + coverPrice;
printf("Total Bill Amount: %.2f\n", total);
return 0;
    }
```

OUTPUT:

```
Enter the price of iPhone: 100000
Enter the price of Cover Case: 3000
Total Bill Amount: 103000.00
